EXECUTIVE BRIEF

Canadian Crime, 2025

Overall crime eased in 2025 — but only modestly, and not everywhere. A first turn down after a decade of rising severity.

Prepared for the Executive Team · August 2026

T L ; D R

A mixed picture — headlines down, but only a little

−4.86%

Crime Severity Index

Second straight annual decline — CSI 75.01 in 2025 vs. 78.84 in 2024.

−2.4%

Overall crime rate

Per 100,000 population, vs. 2024. A modest give-back.

+2.35%

Weighted clearance rate

Reversing a decade-long slide.

−16.5%

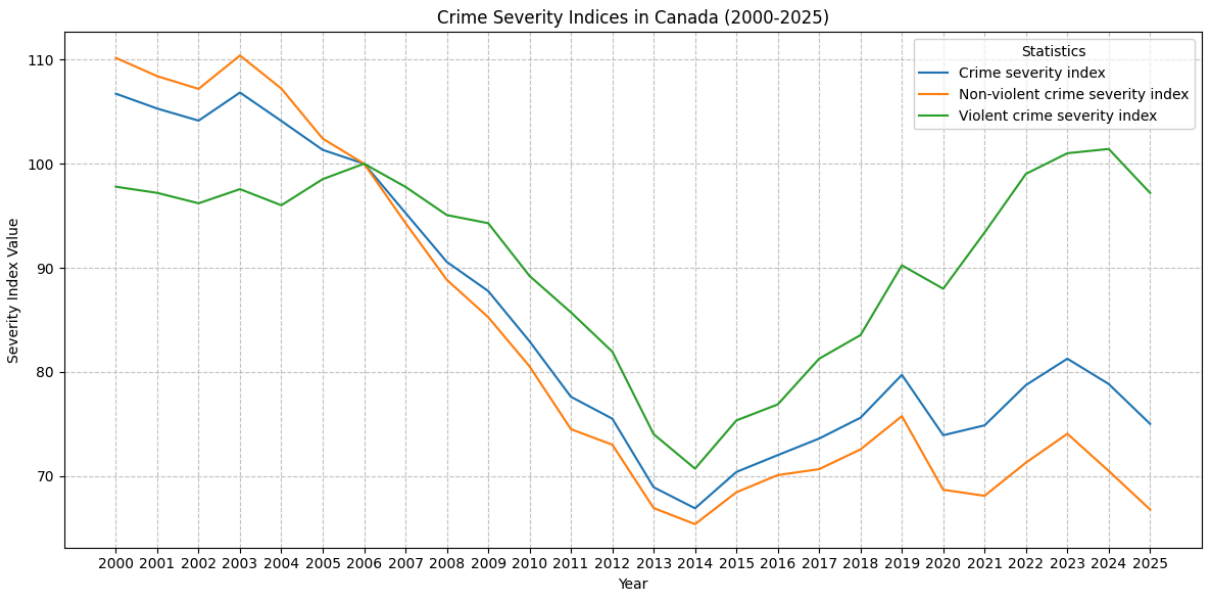

Homicide rate

First-degree murder down 23.7%.

Headlines moved down and clearance moved up — but the improvement is small next to a decade of increases.

THE LONG VIEW

Crime Severity Index — a small step back after a long climb

What the line shows

The 2025 numbers: CSI 75.01 (−4.86%). Non-violent CSI 66.78 (−5.26%). Violent CSI 97.19 (−4.17%).

A modest reversal, not a return

Violent CSI climbed almost every year from 2014 through 2024. 2025's dip walks back only a fraction of that decade-long climb.

Non-violent led the improvement

Non-violent CSI drives most of 2025's improvement — down 5.3% year over year.

THE GOOD NEWS

Improvement across most major categories

01 Violent crime

−16.5% Homicide rate

−23.7% First-degree murder rate

−15.0% Attempted murder rate

Deep declines in the most serious offences.

02 Property crime

−16.4% Motor-vehicle theft rate

−10.6% Breaking & entering rate

−3.8% Total property crime rate

Big-ticket property crimes fell sharply.

03 Cyber, organized & hate

2nd yr Cybercrime — second year of decline

1st yr Organized crime — first drop since 2021

−3% Hate crime incidents

All three categories saw declines in 2025 vs. 2024.

Year-over-year change vs. 2024 · rates per 100,000 population

Statistics Canada · July 2026 release

BUT NOT EVERYWHERE

Serious offences that still moved the wrong way

+4.10%

Arson, disregard for human life

Rate per 100,000 population · the most dangerous arson category rose against a falling overall trend.

+3.49%

Sexual assault, level 2 (weapon or bodily harm)

Aggravated sexual assault categories moved unevenly — level 1 was −1.22%, level 3 was −3.19%, but level 2 climbed.

+16.7%

Trafficking in stolen property

The sharpest jump in the property-crime table — even as motor-vehicle theft and B&E fell sharply.

+11.4%

Shoplifting $5,000 or under

Now 501.6 per 100,000 — continues to run against the broader property-crime decline.

+2.66%

Theft over $5,000

One of the few high-value property categories to rise year over year.

WHY THIS MATTERS

The overall picture is down, but **the headline masks pockets that got worse** — and two of them (arson-with-disregard-for-life and level-2 sexual assault) sit at the serious end of the harm scale.

These are the offences to **flag for programme leads** even as we communicate an overall improvement.

CYBERCRIME

Cybercrime plateaus — a second straight year off the peak

Main insight

After roughly a decade of near-continuous growth, cybercrime has **cooled** — 2025 is the **second straight decline** since 2023.

But look at the scale

90,643 violations in 2025 is still **~6× the 2014 baseline** of 15,184. The plateau is high, not low.

Fraud dominates

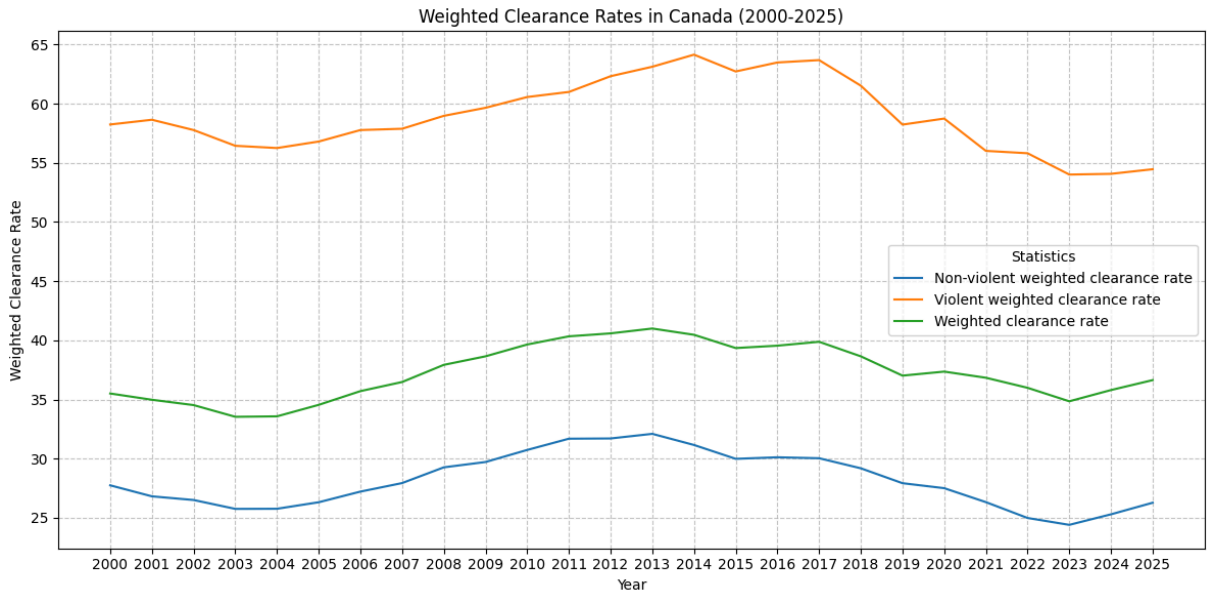

Fraud alone accounts for 44,542 of 2025 cyber violations — nearly half the total.

POLICE CLEARANCE

Clearance rate ticks up — first real gain in a decade

Main insight

36.64% of cases cleared in 2025 — **+2.35%** from 2024. Violent clearance **54.46%**, non-violent **26.28%**.

Serious cases fare best

Violent clearance: 54.46% (roughly half solved). **Non-violent:** just 26.28% — about three-quarters unsolved.

A start, not a fix

One year doesn't undo a decade. Watch whether clearance **holds above 36% in 2026** before calling it a durable turn.

PUT IT IN CONTEXT

A modest give-back after a decade of rising severity

WHERE CSI SITS NOW

75.01

2025 CSI of 75.01 — down from 78.84 in 2024 but still well above the 2014 low visible on the CSI chart.

VIOLENT CSI STAYS HIGH

97.19

Violent CSI fell 4.17% to 97.19 — **barely off its 2024 peak of 101.42**, and roughly where it sat in 2007.

SIZE OF THE MOVE

−2.4%

Overall crime rate fell 2.4% and CSI fell 4.86% — **a modest improvement** against the multi-year climb in the CSI chart above.

DIRECTION OF TRAVEL

2 years down

A second annual decline is **real, not noise** — but one more data point is needed before calling it a durable reversal.

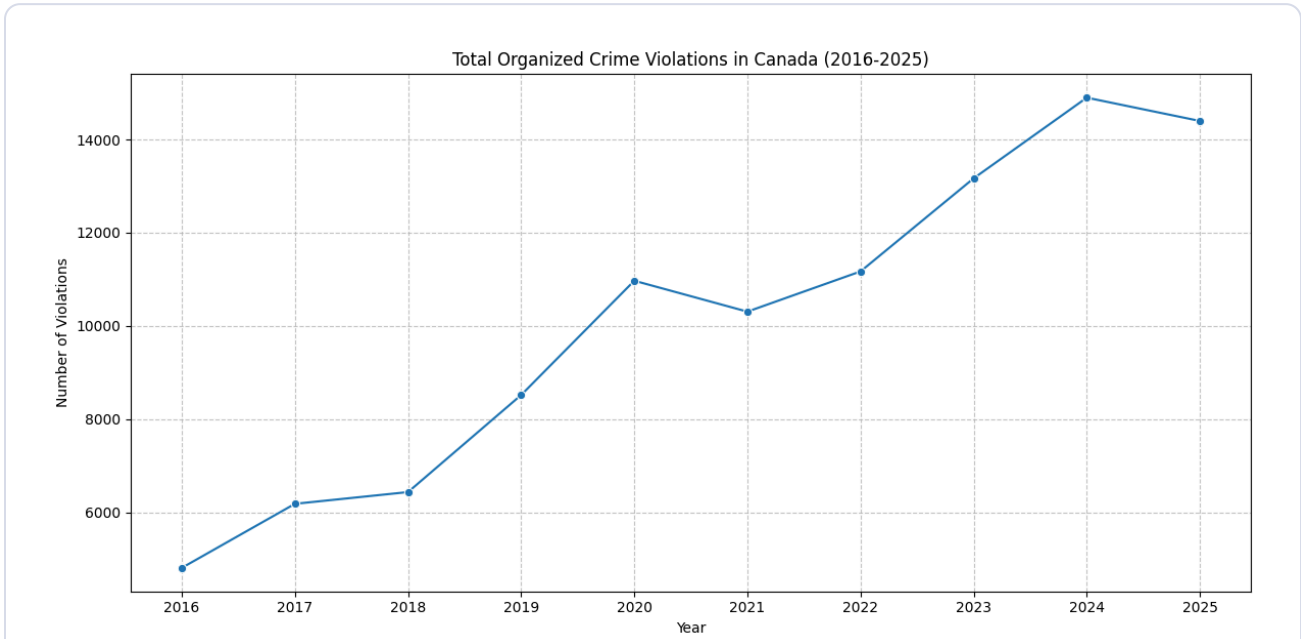

Bottom line: *the direction turned in 2025, but the magnitude is small and the gains are uneven. Communicate an improving trend — and keep resourcing on the serious offences that still moved up.*

ONE TO WATCH

Organized crime — 2025 breaks a 5-year climb

What the line shows

Roughly tripled from 4,810 violations in 2016 to 14,898 in 2024.

First step down in five years

2025 dipped to 14,398 — the first year-over-year decline since 2021, but still nearly 3× the 2016 level.

Where the volume is

Fraud (6,728) and **motor-vehicle theft (1,475)** remain the top two organized-crime charges.
